## PROGRAMMI NG

This programming module is valid for the following series of machines:

- Brisa
- City
- Mistral
- Presto
- Sienna
- Tempo

Depending on the series and the model of the machine, some of the programming functions that are described in this document are NOT operative

Programming:

## 1. PROGRAMMI NG

### 1.1. DEFI NITI ONS

Battery: a set of machines made up of:

- A hot drink vending machine from the TEMPO or CITY range and a Module B or H .
- A payment module and a Module B or H.

Programming mode: when the machine is ready for any of its functions to be programmed.
Working mode: when the machine is ready for the user to request any of the services it offers.

Machine: when the word "machine" is mentioned, we refer to the Payment Module or the hot drink vending machine that the modules are connected to.

General menu: these are all the programming functions.
Personal menu: These are the programming functions that the operator wants to be shown on the display. The programming functions that are not included in this menu are hidden from view.

Selection buttons: These are the product selection buttons on the door on the outside of the machine.

### 1.2. GENERAL MENU: ACCESS TO THE PROGRAMMI NG GROUPS

The programming functions are grouped in the following way following:

| Group 000 | Actions |
| :--- | :--- |
| Group 100 | Accounting |
| Group 200 | Programming prices and exit mode |
| Group 300 | Programming selections |
| Group 400 | Programming the service mode on the machine |
| Group 500 | Clock functions |

To access the programming functions, press button $\mathbf{A}$ for 5 seconds.
Pressing A or B advances or recedes through the different function Groups.
Pressing $\mathbf{D}$ accesses the different functions in the Group.
Pressing A or B advances or recedes through the functions in the Group.

Programming:

### 1.3. GENERAL MENU: DI RECT ACCESS TO ALL THE FUNCTI ONS

It contains all the programming functions.
To access the general menu press and hold button D on the programming handset for 5 seconds. The display on the machine will show: "hidden prog", and then the first programming function.

Pressing A or $\mathbf{B}$ visualises all the available functions in the basic menu;
Pressing A advances and pressing B recedes.
The functions that are shown on the display with a $\mathbf{P}$ between the function number and the name of the function are visible programming functions in the personal menu. Those that have a dash instead of a $\mathbf{P}$ are hidden programming functions.

Pressing "D" makes the function go from visible to hidden or vice versa.
To exit programming mode to working mode, press button $\mathbf{C}$ on the programming handset. If no action has been taken in 30 seconds, the machine automatically goes back to working mode.

### 1.4. PERSONAL MENU: ACCESS TO ALL THE FUNCTI ONS

To access the functions in the personal menu, press button $\mathbf{C}$ de the programming handset. The display will show the first function of the personal menu. Pressing the buttons $\mathbf{A}$ or $\mathbf{B}$ on the programming handset will show the rest of the programming functions on the display.

The personal menu can be made up of up to a maximum of 32 programming functions

### 1.5. PERSONAL MENU: ACCESS A DETERMI NED FUNCTI ON

To access the functions of the personal menu, press button $\mathbf{C}$ for 5 seconds and with buttons $A, B$ and $C$ make the number of the function you wish to access.

### 1.6. DESCRIPTION OF ALL THE PROGRAMMI NG FUNCTIONS

The following is a description of all the programming functions available in the general menu. In function 401 COUNTRY CODE/ MACHI NE you can see the factory default personal menu.

Programming:

The reader can access each one of the programming functions in this document following one of the methods described above in the previous points

The deferent programming functions that are described in this document, will be visible on the display, or not, depending on the machines in the battery. See the following table:

| Function | With <br> Validator system | With EXECUTIVE protocol | With <br> MDB protocol |
| :---: | :---: | :---: | :---: |
| 001 | $\bullet$ | $\bullet$ | O0 |
| 002 | $\bullet$ | $\bullet$ | Q0 |
| 010 | $80$ | 90 | 00 |
| 030 | $80$ |  | 90 |

| 539 | $20$ | $20$ | 0 |

## Group 000: Actions

| Function 001 | <<EMPT. OUT TUB>> | Extract coins from a change tube. |
| :--- | :--- | :--- |
|  | It allows you to extract coins from the change tubes of the coin changer. |  |

## 001 EMPT.OUT TUB

## D

## T. 10001

A, B Selection of the change tube.
D Start extracting coins from the selected change tube.
C Back to main menu.

| Function 002 | <<FILL IN TUBE>> | Refill a change tube with coins. |
| :--- | :--- | :--- |
|  | It allows you to introduce coins for using as change in the change tubes. |  |

## 002 FILL IN TUBE

D
Now you may introduce coins into the slot on the front of the machine.

C Back to main menu.

| Function 010 | <LISTING>> | Data related to the event log. |
| :--- | :--- | :--- |
|  | This allows you to see or print the accounting data and the incident log <br> on paper. The data goes to a RS-232-C port in ASCII format with lines of <br> 40 columns. |  |

| Function $\mathbf{0 3 0}$ | <<TEST MACHI NE>> | Test for different elements in the <br> machine. |
| :--- | :--- | :--- |
|  | Run a test of the different elements of the machine. |  |

```
030 TEST MACHINE
The display shows the first element to be tested.
```

The process is always the same, and the elements to do the tests on are the following:

- Motors
- Drawers: from A to H .
- Gate: open and close gate
- Lift.
- Delivery hatch
- Temperature
- Idtect
- Mixers
- Extractor
- Electro valve
- Refill boiler
- Move group
- Grinder
- Dosage
- Etc

Programming:

| Function 081 | $\ll$ I NTRO.DESCRI PT. $\ggg$ | Exports the machine's configuration <br> to an external device. |
| :---: | :--- | :--- |
| Only operative <br> when the <br> machine is <br> connected to the <br> User Tool <br> (Herr-Mant) | This allows you to save the machine configuration to an external device. |  |

| Function 082 | <<LOAD CONFIG.>> | Accepts a file with a determined <br> machine configuration. |
| :---: | :--- | :--- |
| Operative when <br> the machine is <br> connected to the <br> User Tool <br> (Herr-Mant) | This allows you to save a machine configuration to the machine from an <br> external device. |  |

A list of all the configurations recorded on the memory of the User Tool is shown. If there are more than 10 configurations, a menu will appear to be able to select configurations 1 to 10,11 to 20 , etc.

| Function 090 | <<SW. VERSIONS>> | Version of the software that is <br> installed on the machine. |
| :--- | :--- | :--- |
|  | This shows the software version of each one of the different modules <br> connected. |  |

## 090 SW. VERSI ONS

CHOOSE A MODULE
MAIN MODULE
The display shows the deferent options. For each one of the
options the display shows the update and the programme code of
the software.

| Function 099 | <<I NITIALIZAT.>> | Carry out a complete reset of the <br> programming on the machine. |
| :--- | :--- | :--- |
|  | Executing this function will erase the EEPROM memory and it will <br> automatically recuperate the last configuration introduced with the User <br> Tool Herr-mant. If there is not any configuration, it will load the factory <br> default programming. |  |

## 099 INITIALIZAT.

Now the data will be deleted.

## Group 100: Accounting

| Function 110 | <<MONEY/ SELECT>> | The total amount taken in sales for <br> each selection. |
| :--- | :--- | :--- |
|  | This shows the takings from sales for each product selection. |  |

```
110 MONEY/ SELECT
```

```
s01 Press selection On pressing a selection, the display shows the sales for this selection.
1.5
C Back to main menu.
```

| Function 111 | <<UNITS/ SELECT>> | Units sold for each selection. |
| :--- | :--- | :--- |
|  | This shows the number of sales for each product selection. |  |

111 UNITS/ SELECT

S01 PRESS SELECTION
On pressing a selection, the display shows the number of sales.

C Back to main menu.

| Function 113 | <<UTS/ SEL F.V.>> | Units sold in "free sale". |
| :--- | :--- | :--- |
|  | This shows the number of sales in free service mode for each product <br> selection. |  |

## 113 UTS/ SEL F.V.

S01 PRESS SELECTION
On pressing a selection, the display shows the number of sales in free service mode.

C Back to main menu.

| Function $\mathbf{1 2 0}$ | <<TOTAL MONEY $\gg$ | Total amount taken for all sales. |
| :--- | :--- | :--- |
|  | This shows total takings from sales. |  |

## 120 TOTAL MONEY

The display shows the amount taken for all the sales. If
 various machines are linked using a PRI board, you will see the total sales of all the machines.

| Function 121 | <<TOTAL UNITS>> | Total number of units sold. |
| :--- | :--- | :--- |
|  | This shows the total number of sales of the machine. |  |

## 121 TOTAL UNITS

The display shows the number of units sold of all the machines.

The display shows the total sum of each one of the machines:
B "Module E", hot drink machine
"Module A", cold drink machine
C Back to main menu.

| Function $\mathbf{1 2 2}$ | <<TOT.CSH.F.V.>> | Total amount of the "free sales" <br> vends. |
| :--- | :--- | :--- |
|  | This shows the total value of all the sales of the machine in "free service" <br> mode. |  |

## 122 TOT.CSH.F.V.

D
The display shows the total value of all the sales of the machine in "free service" mode.

C Back to main menu.

| Function 125 | <<COST PRESEL.>> | Increase or discount for the pre- <br> selection buttons. |
| :--- | :--- | :--- |
|  | This shows the increase or decrease in price for each of the pre <br> selections. |  |

125 COST PRESEL.

D

PS1 NO SUGAR
On pressing a pre selection, the display shows the value of that pre selection.

C Back to main menu.

| Function $\mathbf{1 2 6}$ | <<UNITS PRESEL.>> | Sales of each pre-selection. |
| :--- | :--- | :--- |
|  | This shows the number of sales with each pre selection. |  |

## 126 UNITS PRESEL.

D

PS1 NO SUGAR
On pressing a pre selection, the display shows the number of sales for that pre selection.

C Back to main menu.

| Function 141 | $\ll$ MON.CASH BOX $\gg$ | Total amount in the cash box. |
| :--- | :--- | :--- |
|  | It shows the amount of cash in the cash box. The maximum figure that <br> can be shown is $€ 999.999$. |  |

## 141 MON.CASH BOX

| Back to main menu. |
| :--- |
| 10187 UK $07-2007$ |

| Function $\mathbf{1 4 2}$ | <<MON.IN CH.G.>> | Total amount in the change tubes. |
| :--- | :--- | :--- | :--- |
|  | It shows the amount of cash in the change tubes. |  |

| Function $\mathbf{1 4 3}$ | $<$ COI NS IN C.G>> | Amount in each change tube. |
| :--- | :--- | :--- |
|  | This function is only operative when the coin changer has MDB protocol. <br> It shows the amount of cash in each change tube. |  |

## 143 COINS IN C.G

## D

25.10 EURO Shows the amount of cash in each change tube.

| Function 145 | << CASH RET. MAN >> | Amount extracted by executing F001. |
| :--- | :--- | :--- |
|  | It shows the amount of cash extracted manually from the change tubes <br> by the operator. |  |

```
    145 CASH RET. MAN
```

```
D
0000.00 EURO
Shows the amount of cash extracted manually.
C Back to main menu.
```

| Function 146 | <<MON.NOT GIV.>> | Value of the change NOT given to <br> customers. |
| :--- | :--- | :--- |
|  | It shows the total amount of change that has not been returned to the <br> customers for various reasons. |  |

| Function 149 | <<BANKNOTES $\gg$ | Total amount of sales from notes. |
| :--- | :--- | :--- |
|  | It shows the total amount of cash from sales paid using notes. |  |

| Function 162 | <<TOKEN COLLEC>> | Total amount of sales from tokens. |
| :--- | :---: | :--- |
|  | It shows the total value of all the tokens taken. |  |

## 162 TOKEN COLLEC

 Shows total value of all the token 1.

Alternates between token 1 and token 2.

C Back to main menu.

| Function 171 | <<DELETE ACC. $\gg$ | Erasure of accounting figures. |
| :--- | :---: | :--- |
|  | This will delete the data in all the following functions: |  |

| 110 | Cash Sel. | 141 | Cash in cash box |
| :---: | :--- | :---: | :--- |
| 111 | Sales Sel. | 145 | Cash extracted manually |
| 113 | Units in "free sale" | 146 | Change not given |
| 120 | Total cash | 147 | Sales from smartcard |
| 121 | No Services | 148 | Cash taken for smartcard |
| 122 | Value of free sale | 149 | Cash from note reader |
| 125 | Cash from pre-selections | 162 | Cash from tokens |
| 126 | Sales of pre-selections |  |  |

## 171 DELETE ACC.

D The accounting data is deleted.
C Back to main menu.

| Function 174 | <<DEL. ACC. RET>> | Erasure of the accounting data of the <br> change tubes. |
| :--- | :--- | :--- |
|  | This will delete the data in the following functions: |  |

| 142 | Accounting of vale of coins in tubes | 143 | Accounting of coins per tube |
| :--- | :--- | :--- | :--- |

| Function 180 | $\ll$ P/ TOTAL SAL. $\gg$ | Accumulated amount of the total <br> sales. |
| :--- | :--- | :--- | :--- |
|  | This shows the total value of all sales made by the machine. This <br> information cannot be deleted. |  |

| Function 183 | $\ll$ P/ MONEY CASH $\gg$ | Accumulated amount of cash in the <br> cash box. |
| :--- | :--- | :--- |
|  | This shows the total amount of cash in the cash box. This information <br> cannot be deleted. |  |

| Function 185 | <<P/ MON.G.MAN.>> | Accumulated amount manually <br> extracted from the change tubes. |
| :--- | :--- | :--- |
|  | This shows the total amount of cash extracted manually from the change <br> tubes by the operator. This information cannot be deleted. |  |

| Function 187 | $\ll$ P/ CRED.CARD $\gg$ | Accumulated amount of all sales from <br> smartcards. |
| :--- | :--- | :--- |
|  | This shows the total amount of the sales paid using a smartcard. This <br> information cannot be deleted. |  |

## 187 P/ CRED.CARD

| Function 189 | $\langle<$ P/ BILLS $\gg$ | Accumulated amount of the sales paid <br> for with notes. |
| :--- | :--- | :--- |
|  | This shows the total amount of cash from sales paid using notes. This <br> information cannot be deleted. |  |

## 189 P/ BILLS

D
0000.00 EURO Shows the total amount.

C Back to main menu.

| Function 190 | $\ll$ P/ TOK.COLEC. $\gg$ | Accumulated amount of all the sales <br> paid for with tokens. |
| :---: | :--- | :--- |
|  | This shows the total value of all the tokens taken. This information <br> cannot be deleted. |  |

## 190 P/ TOK. COLEC.

D

0000000 EURO
Shows the total amount.

| Function 193 | $\ll$ P/ UTS/ SEL FV >> | Accumulated amount of all the sales <br> of each product selection in "free <br> sale" mode. |
| :--- | :--- | :--- |
|  | This shows the total value of all the sales for each product selection while <br> the machine was set in "free sale" mode. This information cannot be <br> erased. |  |

## 193 P/ UTS/ SEL FV

PRESS SELECTION:
On pressing a selection, the display will show the number of services of this selection that has been vended while in "free sale" mode.

C Back to main menu.

## Group 200: Programming the prices and sales mode

| Function 201 | <<PRICES PROGR>> | Sales prices for each product <br> selection. |
| :--- | :---: | :--- | :--- |
|  | This programmes the sales prices of the different product selections. |  |

| Function 202 | <<PRICE/ SELECT>> | Copy the sales price to various <br> product selections. |
| :--- | :--- | :--- |
|  | This allows you to copy the same price to various product selections. |  |

```
202 PRICE/ SELECT
4.5
```

202 PRICE/ SELEC PRICE: 99.99 Euro
 PRESS SELECT

202 PRICE/SELEC Allows you to assign a price to various selections by
Allows you to program a sales price.

Increase or decrease this amount.
Move to the next digit. pressing on their corresponding selection button.

Back to main menu.

| Function $\mathbf{2 0 3}$ | <<ALTERN.PRICE>> | Alternative sales prices. |
| :--- | :--- | :--- |
|  | This allows you to programme other sales prices for the happy hour. The <br> happy hour will work if programmed in the function $530 \ll$ happy <br> hour>>. |  |

Repeat the operation as many times as necessary
I
D The machine goes to working mode.

| Function 204 | <<SINGLE | CE>> | Only one sales price for all selections. |
| :---: | :---: | :---: | :---: |
|  | This programmes the same sales price for all the product selections. |  |  |
| 204 SINGLE PRICE |  |  |  |
| $\square 5$ D |  |  |  |
| 0.50 EURO |  | Shows the sales price for all the products. |  |
| $1.5$ | A | Increase the value. |  |
|  | B | Decrease the value. |  |
|  | D | Access the next digit for modification. |  |
| 1 | C | Back to main menu. |  |

| Function 206 | <<AGE CHK/ SEL>> | Impedes the sale of products to <br> minors. |
| :--- | :--- | :--- |
|  | It is possible to install a system on the machine that impedes the sale of <br> certain products unless the machine has previously been activated with a <br> remote control or by introducing a token. |  |

206 AGE CHK/ SEL

D Access the submenu

206 ACC. MENOR/ S PRESS SELECTION

A
Modifies the programming between YES and NO
B
D Saves the programming and allows the modification of another selection.

C Back to main menu.

| Function 209 | <<PRICE/ PRESEL>> | Activates a discount or overprice for <br> the pre-selections. |
| :--- | :--- | :--- |

This programmes a discount an extra for each one of the pre selections on the hot drink machine in the battery.

## 209 PRESEL. PRICE

## D

## PRESS SELECTION

Shows the first pre selection.

A Increase the value.
B Decrease the value.
C Access the next digit for modification.
C Back to main menu.

Repeat the operation as many times as necessary

D The machine goes to working mode.

| Function $\mathbf{2 2 0}$ | <<FREE SALE>> | The machine vends products for free. |
| :--- | :--- | :--- |
|  | Programme the machine to elaborate the services for free. It is not <br> necessary to pay for the product. |  |

When programmed for free service, all the products in the machine are free

| Function 221 | <<METHOD PURCH>> | Vends in simple, multiple or obliged <br> sale modes. |
| :--- | :--- | :--- |
|  | Programme the possible sales modes, multi vend or forced sale. |  |

## 221 METHOD PURCH

Access the submenu that contains the programmable data:

D Time for remaining credit
Time to maintain credit available
D Change the digits.
A Increase the value.
B Decrease the value.
C Back to main menu.

| Function 228 | <<ACCESS CTRL>> | Impede the sale of products to <br> minors. |
| :--- | :--- | :--- |
|  | It is possible to install a system on the machine that impedes the sale of <br> certain products unless the machine has previously been activated with a <br> remote control or by introducing a token. |  |

## 228 ACCESO MENOR

D No control.
A
Shows the possible programming options: "No control", "Remote control", "Token" and "Token selection".
B
D Programme the option shown on the display.
C Go back and exit the menu.

Programming:

## Group 300: Programming de selections

| Function $\mathbf{3 0 0}$ | <<SEL/ SERV.LNK $\gg$ | Associates product selections to the <br> products. |
| :--- | :--- | :--- |
|  | Allows you to assign a determined service to each product selection <br> button. These services are programmed with the standard quantities of <br> water and powder. |  |

## 300 SEL/ SERV.LNK

## PRESS SELECTION

On pressing the product selection button, the display will show the product it has been assigned.

Service "Validate Button". This option can associate any button on the machine, whether it is "pre-selection" or "direct selection".

It is operative when the machine is programmed for "free sale"; after pressing the button of the desired product, it is necessary to also activate the "validate button", so that the machine carries out the service.

| Function $\mathbf{3 0 3}$ | <<PROMOTIONS>> |  |
| :---: | :--- | :--- |
| Not operative |  |  |

| Function $\mathbf{3 1 5}$ | <<SERV.PROGRAM>> | Quantity of product and water for <br> each service. |
| :--- | :--- | :--- |
|  | Programme the quantities of product and water for each service in the <br> coffee machine in the battery. |  |

## 315 SERV.PROGRAM

|  |  | Shows the options: |
| :---: | :---: | :---: |
|  | D | Modify step by step |
|  |  | Add a step |
|  |  | Delete a step |
|  | A |  |
| $5$ |  | Select one of the options. |
|  | B |  |
| 5 | D | Execute the selected option. |
|  | A | Increase or decrease the value of the pre-selection. |
|  |  | Modify step by step (allows you to modify the dosage of the product and water of each of the product selections). |
| $5$ |  | Add step (allows you to add another step in the process of elaborating the product). |
|  | B | Erase step (allows you to remove a step in the process of elaborating the product). |
| $5$ | D | Allows the modification of the next digit or shows the first preselection on the display. |
|  | A |  |
| $5$ |  | Increase or decrease the values |
|  | B |  |
| 3 | C | Back to main menu. |

| Function $\mathbf{3 1 7}$ | <<PRESEL.PROGR>> | Modify value of the pre-selections. |
| :--- | :--- | :--- |
|  | Modify the percentages of the dosage of product of the pre-selections. It <br> also allows you to choose the container that the product is extracted <br> from when a direct selection is chosen, if you have previously selected a <br> pre-selection. |  |

Hopper origin: The container the product is extracted from on selecting a "direct selection". Hopper destination: The container from which the product is extracted on selecting a "direct selection" if a "pre-selection" button has previously been selected.

Programmable pre-selections:

| PS.6 | Decaffeinated, between 0 <br> $300 \%$ | and | PS. 8 |
| :--- | :--- | :--- | :--- |
| Less water, between 0 and 200 \% |  |  |  |
| PS. 7 | Extra milk, between 0 and 200\% | PS. 9 | Instant coffee, between 0 and 200 \% |

| Function $\mathbf{3 2 0}$ | <<PREHEAT UP>> | Pre-heating of beaters with hot <br> water. |
| :---: | :--- | :--- |
| This function is <br> shown when <br> there is hot drink <br> machine in the <br> battery | When there is a determined time between the elaborations of services, <br> the machine preheats the beaters that are used in the elaboration of the <br> service. The interval of time is programmed in the function 493 <br> <<MINUTES PREHEATING>>. Operative if there is hot drink machine. |  |

## 320 PREHEAT UP

Shows on the display the time interval for preheating.
Increases or decreases the time.
Allows the modification of the next digit or shows the
Preheat YES.

| Function $\mathbf{3 3 0}$ | <<EXTR.MOD.PROG>> | Recognition of the extractor module. |
| :--- | :--- | :--- |
|  | Recognises, if there is one, the extractor module Brisa-Mistral connected <br> to a City/Tempo. |  |

```
330 EXTR.MOD.PRG
D Accept.
    OPERATION OK
```

If there are two extractor modules connected to a City/tempo or Payment module, this function will request the identification of 1 and 2 .

| Function 331 | <<POS. ELEVATOR>> | Presence of the elevator for <br> extracting products. |
| :--- | :--- | :--- |
|  | Activate the presence of the elevator in the machine and programme the <br> position of the collection of the product for each shelf. |  |

Shows present programming
Select YES or NO.
Confirm the programming. Selecting YES activates the the shelf to programme.
presence of the elevator and accesses the programming of
the height of the shelves.
When it is activated for the first time, the elevator carries
out a complete up and down movement.

If a shelf is programmed 000, the elevator will not move when a product is requested form this shelf.

Programming:

Group 400: Programming the service mode of the machine

| Function 401 | <<PROGRAM TYPE>> | Reprogramming the with factory <br> defaults. |
| :--- | :--- | :--- | :--- |
|  | Reprogramme the machine <br> functions will become visible: |  |

| 030 | Test machine | 315 | Programming service |
| :--- | :--- | :--- | :--- |
| 110 | Cash selection | 420 | Publicity |
| 120 | Total cash | 490 | Hopper name |
| 201 | Programming prices | 491 | Service name |
| 300 | Associate selection buttons | 510 | Date / time |

## 401 PROGRAM TYPE

The display shows present model.

| Function 412 | <<ACCEPT. COI NS $\gg \quad$ Programme the coins accepted. |
| :--- | :--- | :--- |
|  | This function is only operative when the coin changer has MDB protocol. <br> Programme the coins that are admitted by the coin changer. |

## 412 ACCEPT. COI NS

The display shows the present progra

| Function 416 | <<MAX. ADMI S.>> | Programming the maximum number <br> of coins accepted for a vend. |
| :--- | :--- | :--- |
|  | Programme the maximum number of coins the machine will accept for as <br> service. |  |

416 MAX. ADMIS.

D

## M01 00.05055 Shows the type of coin.

A Shows the coins in ascending order.
B Shows the coins in descending order.
C Go back and exit the menu.
D Access the type of coin on the display.

The last three figures indicate the amount of coins accepted.

| Function 418 | <<ADM. IN NO CH>> | Coins accepted when the machine is <br> "OUT OF CHANGE". |
| :--- | :--- | :--- |
|  | Activate/Inhibit the admission of coins depending on their value when <br> the machine is "OUT OF CHANGE". |  |

## 418 ADM. IN NO CH

## M01 00.05 NO sI

> Shows the type of coin to activate/inhibit.

| Function 419 | <<NO CHANGE>> | Minimum number of coins in each <br> change tube. |
| :--- | :--- | :--- |
|  | Programme the minimum number of coins that each change tube should <br> have so the machine shows the message "out of change". |  |

## 419 NO CHANGE

| Function 420 | <<ADVERT.MESS.>> | Advertising message. |
| :--- | :--- | :--- |
|  | Programme a message that will be shown on the display of the machine. <br> It has a maximum of 100 characters. This message will alternate with <br> the temperature time and "Azkoyen" messages. |  |

420 ADVERT.MESS.

Programming:

| Function 421 | <<EFFECT. MESS.>> | Flashing publicity message. |
| :--- | :--- | :--- |
|  | Programme a message that will be shown on the display of the machine. <br> It has a maximum of 16 characters. This message will alternate with the <br> temperature, time and "Azkoyen" messages. |  |

## 421 EFFECT. MESS.

 Shows the present message.A Shows the characters ascending.
B Shows the characters descending.
C Delete the last character programmed
D Stores the character shown on the display.
D or REFUND. Store the message.

Programming:

| Function 424 | <<FAULT MESS $\gg$ | OUT OF ORDER message. |
| :--- | :--- | :--- |
|  | Programme a message that will be shown on the display of the machine. <br> It has a maximum of 16 characters. This message will be shown when <br> the machine is "out of order". |  |

424 FAULT MESS

D
---y---**++ Shows the present message.

A Shows the characters ascending.
B Shows the characters descending.
C Delete the last character programmed
D Stores the character shown on the display.
D or REFUND. Store the message.

| Function 430 | <<LANGUAGE>> | Language that the machine uses. |
| :--- | :--- | :--- |
|  | Programme the language that will be used for the messages on the <br> display. You may select between Spanish, French, English, Portuguese <br> and Italian, German, katakana and Cyrillic. |  |

| 430 LANGUAGE |  |  |
| :---: | :---: | :---: |
| 1.5 | Allows you to choose one of the following languages: Spanish, French, German, English, Portuguese or Italian. |  |
| ENGLISH | Shows the present language. |  |
|  | Saves the changes and the machine goes into working mode. |  |
| nction 431 | <<COIN NAME>> | Name given to the currency the machine works with. |
|  | Programme the name of the currency that will be shown the display of the machine. This name can have up to 3 characters. |  |

| Function 432 | <<DECI MALS>> | Choose the position of the decimal <br> point of the currency. |
| :--- | :--- | :--- |
|  | Programme the position of the decimal point used in the prices on the <br> display. |  |

| Function 450 | <<KEYB. TYPE>> | Type of product selection keyboard. |
| :--- | :--- | :--- |
|  | Programme the model of keyboard the machine is using; proximity or <br> membrane. |  |

| Function 452 | <<BEEP YES/ NO $\gg$ | Buzzer YES/ NO. |
| :--- | :--- | :--- | :--- |
|  | Programme if the buzzer sounds or not. |  |

| Function 454 | <<CARD READER>> | Card reader Yes/ No. |
| :--- | :---: | :--- |
|  | Programme if the card reader is operative or not. |  |

## 454 CARD READER

The display shows the options YES / NO.

D Save changes and the machine goes to working mode.

| Function 455 | <<BI LL READER $\gg$ | Note reader Yes/ No. |
| :--- | :---: | :--- |
|  | Programme if the note reader is operative or not. |  |

455 BILL READER

D Save changes and the machine goes to working mode.

| Function 458 | $\ll$ CUP PRESENCE $\gg$ | System IDETECT Yes/ No. |
| :--- | :--- | :--- | :--- |
|  | Programme if the product exit detector is operative or not. |  |

| Function 459 | $\ll$ M/ S MDB $\gg$ |  |
| :---: | :--- | :--- |
| Not operative |  |  |

| Function 461 | $\ll$ TEMPERATURE $\gg$ | Temperature of the water in the <br> boiler. |
| :--- | :--- | :--- |
|  | When a hot drink machine is present in the battery, programme the <br> temperature of the water in the boiler. The range of temperatures is <br> from $40^{\circ} \mathrm{C}$ to a maximum of $95^{\circ} \mathrm{C}$ in steps of one degree. |  |

| Function 463 | <<AUTOMAT. WASH>> | Auto cleaning of the product beaters. |
| :--- | :--- | :--- |
|  | When a hot drink machine is present in the battery, programme the auto <br> cleaning of the product beaters after a determined interval of time. This <br> time is programmable: 15 minutes, 30 minutes, 1 hour, 3 hours, 6 hours <br> and 12 hours. You can also programme the quantity of water consumed <br> during the cleaning process; the maximum quantity programmable is 50 <br> cc. |  |

| Function 465 | <<AUTONOMY>> | Presence of an autonomous water <br> supply kit. |
| :--- | :--- | :--- |
|  | When a hot drink machine is present in the battery and if the machine is <br> fitted with an autonomous water deposit, programme "autonomy dep. <br> YES". If the machine runs out of water when using a deposit, the <br> machine will go out of order to protect the water pump motor. |  |

## 465 AUTONOMY

|  | A | Autonomous deposit YES |
| :---: | :---: | :---: |
|  | B | Autonomous deposit NO |
| -5 | D | Store the changes and return back to main menu. |
| 15 | C | Back to main menu. |

| Function 466 | <<SPOON>> | Supply spoon (or stirrer). |
| :--- | :--- | :--- |
|  | When a hot drink machine is present in the battery, programme whether <br> a spoon is included with the service or not. |  |

```
    466 SPOON
    D
    SERVICE 1:
CAFE GRAIN COURT
\(\sqrt{\frac{\mathbf{A}}{\mathbf{B}} \text { Shows the other product selections on the display. }}\)
D Modify the programming.
A
Modify the option programmed.
B
D Store the changes and return back to main menu.
C Back to main menu.
```

| Function 467 | <<CUPS>> | Supply cups. |
| :--- | :--- | :--- |
|  | When a hot drink machine is present in the battery, programme whether <br> a cup is included in the service or not. |  |

## 467 CUPS

D

## SERVICE 1: CAFE GRAIN COURT

| Function 468 | <<TEMPERATURE>> | Temperature of the refrigerated area <br> where the snacks or drinks are <br> stored. |
| :--- | :--- | :--- |
|  | This allows you to programme the temperature of the interior in the <br> Modules B or H. |  |

## 468 TEMPERATURE

04

Increase or decrease units and tens.
B

D Save the data and change from units to tens.
D Save the changes and the machine goes to working mode.

| Function 469 | <<SANITARY TEMP>> | Sanitary temperature. |
| :--- | :--- | :--- |
|  | This function can put some shelve OUT OF ORDER if the temperature of <br> the storage area goes above a certain value for a predetermined period <br> of time. |  |

Time "machine OFF": Maximum time that the machine can be switched off, if this time is exceeded, the previously programmed shelves will be "out of order"

Time "temperature too high": Maximum time that the inside of the machine can be above a "sanitary temperature", if this time is exceeded, the previously programmed shelves will be "out of order".

A Increase the value
B Decrease the value
D Validate the programming.
C Access to modify the "time temperature too high"
TIEMPO TEMP. SUPERIOR 999

A Increase the value
B Decrease the value
D Validate the programming and go back to menu.

| Function $\mathbf{4 7 0}$ | <<NUM.MACHINE>> | I dentification number of the machine. |
| :---: | :---: | :--- | :--- |
| This function is <br> shown when the <br> machine has a <br> communications <br> kit |  |  |
| Allows you to programme a number that is used to identify the machine. |  |  |

| Function 471 | <<NUM.TARJ.COM>> | Number of the communication board. |
| :---: | :--- | :--- |
| This function is <br> shown when the <br> machine has a <br> communications <br> kit | Allows you to programme a number that is used to identify the <br> communication board. |  |

## 471 NUM TARJ.COM

| Function 472 | <<COD. OPERADOR>> | Operator code of the machine. |
| :---: | :--- | :--- |
| This function is <br> shown when the <br> machine has a <br> communications <br> kit | Allows you to programme a number that is used to identify the operator <br> who manages the machine. |  |

## 472 COD. OPERADOR

$\square$ D

CODIGO OPERADOR Programme the operator code (4 digits).

| Function 473 | <<COD.OP. TARJ ETA>> | Operator code of the COM board. |
| :---: | :--- | :--- |
| This function is <br> shown when the <br> machine has a <br> communications <br> kit | Allows you to programme a number that is used to identify the operator <br> of the COM board. |  |

COD.OP.TARJ ETA COM Programme the operator code of the COM board(6 digits).

C Back to main menu.

| Function 483 | $\ll$ PROG. CSCA $\gg$ | Configuration of the MODEM |
| :---: | :---: | :---: | :---: |
| This function is <br> shown when the <br> machine has a <br> communications <br> kit |  |  |
| Programme the message control centre. |  |  |

| Function 486 | $\ll$ TELEF. SMS $\gg$ | Telephone number that will receive <br> the SMS messages. |
| :---: | :--- | :--- |
| This function is <br> shown when the <br> machine has a <br> communications <br> kit |  |  |

| Function 487 | <<NOMBRE MAQ.>> |
| :---: | :---: | :---: | :---: |
| This function is <br> shown when the <br> machine has a <br> communications <br> kit |  |
| Programme a name for the machine. |  |

| Function $\mathbf{4 8 8}$ | << POLL. INCID.>> | Incident polling time |
| :---: | :--- | :--- |
| This function is <br> shown when the <br> machine has a <br> communications <br> kit | You programme the period of time, in seconds, between each time that <br> the machine is interrogated about incidents. If there are new incidents, <br> and their communication has been programmed in F489, an SMS <br> message will be sent. |  |

## 488 POLL. INCID.

| D | Show the time programmed: 65535 |
| :---: | :---: |
| A | Increase. |
| B | Decrease. |
| D | Accept. |
| C | Back to main menu. |

| Function 489 | <<GESTOR INCID>> | Incident manager |
| :---: | :--- | :--- |
| This function is <br> shown when the <br> machine has a <br> communications <br> kit | Not all incidents need an SMS message to be sent. To manage which <br> incidents need to be communicated, you use a numeric value. |  |

## 489 GESTOR INCID

| A | Show the numeric value: 2147483647 |
| :--- | :--- | :--- |
| Increase. |  |
| Becrease. |  |
| A | Accept. |
| C | Go back and exit the menu. |

| Function 490 | < HOPPER NAME>> | Name for the product hoppers. |
| :--- | :--- | :--- |
|  | When a hot drink machine is present in the battery, programme the <br> names given to the product hoppers. In functions $310 \ll$ Programming <br> water>> and 311 <<Programming product $\gg$ you will see the name of <br> the product in the hopper and not a number on the display. |  |

## 490 HOPPER NAME

 Shows the rest of the hoppers.
B

Modify the name. Once you have written the name, move the cursor to the right and it will be stored.

A Shows the alphabet.
B
Once the new name has been written, press and hold
 button "D" until it is saved. Now you can programme a $25 \%$ increase in the speed of the extraction of the product.

## VEL. EXTR+25\% NO

$\square$ Modify the programming YES or NO. B Modify the programming YES or NO.

D Save the changes and go to the next hopper.

C Back to main menu.

| Function 491 | <<SERVICE NAME>> | Name for each one of the product <br> selections. |
| :--- | :--- | :--- |
|  | When a hot drink machine is present in the battery, programme the <br> name of each of the services. These names will be shown on the display <br> when the product selection button is pressed before inserting coins. |  |

## 491 SERVI CE NAME

D

SERV. 1
Shows the name of product selection 1.

A
Shows the rest of the product selections.
B

D
Modify the name. Once you have written the name, move the cursor to the right and it will be stored.

A
Shows the alphabet.
B
D Stores the names.
C Back to main menu.

Group 500: Clock Functions

| Function 510 | <<DATE/TIME $\gg$ | Date and time. |
| :--- | :---: | :--- |
|  | This programmes the date and time of the machine |  |

## 510 DATE/ TIME

| Function 520 | <<CLOCK MODES $\gg$ | Time format. |
| :--- | :---: | :--- |
|  | Programme the change of time for daylight saving in summer. |  |

## 520 CLOCK MODES

D

## SUMMER TIME? YES

| Function 530 | <<EV. TI METABLE> | vent programming timetable. |
| :---: | :---: | :---: |
|  | Programme a series if timetables. At the start time of the event programmed the machine will switch the event on and then off at the end of the time programmed. <br> There are 8 events, and for each one, one of the following options can be programmed: |  |

## 530 EV. TIMETABLE

## EV1: NO PROGAMME

A
The display shows the deferent events, from EV1 to EV8
B

EV4: NO PROGAMME

D Enter the submenu.

EV4: MACH ON/ OFF

The display shows the 7 options the submenu has.

EV4: MACH ON/ OFF 00:00:00

EV4: MACH ON/ OFF 10:30:-> 00:00:00

If the start time and finish time is 00:00:00, the event is not active

| Function 531 | <<EV. WEEKLY C.>> |  | Daily timetable programming. |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Programme the days of the week that the programmed events in the function 530 <<EVENT TIMETABLE>> are active. The possible options are: |  |  |  |
|  | LAB: | Labour days | N/A: | Do not apply |
|  | WKD: | Weekend | MON: | Monday |
|  | TUE: | Tuesday | WED: | Wednesday |
|  | THU: | Thursday | FRI: | Friday |
|  | SAT: | Saturday | SUN: | Sunday |

## 531 EV. WEEKLY C.

EV1: NO PROGAMME

The display shows the different events from EV1 to EV8.

EV4: NO PROGAMME

## Function 538 <<PROG. RESET...>> Time of the daily accounting reset.

As well as the SMS incident messages, it is possible to programme SMS audit

This function is shown when the machine has a communications kit
messages. You can programme an hourly or daily audit message. The format is:

Code 24 (every day) or 28 (every hour).
Minutes.
Hour.
Code: Minutes : Hour

| Function 539 | $\ll$ HOR- SMS.AUD>> | Time of the SMS audit. |
| :---: | :--- | :--- |
| This function is <br> shown when the <br> machine has a <br> communications <br> kit |  |  |

## 539 HOR.SMS.AUD

## "HOTKEYS"

This is a quick way to see the sales of the machine.
The method for the Brisa/Mistral machine is:

- Enter the basic menu, pressing ' C ' on the programming handset.
$\square$
$\square$
Programming handset (inside the machine)
- Check the incidents pressing any button until the first programming function appears.
- Enter the menu as always or with the "hotkeys":
- Pressing 'A', we will directly see the CASH/SELECTION (after it will ask for the selection code; exit pressing ' C ' on the handset)
- Press the 'B' key on the selection keypad to see TOTAL MONEY account.

Selection keyboard (outside the machine)

- $\quad$ Press button ' C ' on the handset to exit the menu.

The functions that can be accessed with the "hotkeys" are not fixed; they can be programmed by the operator but with some restrictions.

The "hotkey" functions will be those that are included in the basic menu and that also belong to the list called "filler". The order is the same as the basic menu.

If the operator wants to include any of the following functions as a "hotkey", they only have to include them in the basic menu. However, you have to remember that the functions can
change. If the machine has the functions $001,002,110,120 \ldots$ in the basic menu, the assignation will be: ' $\mathrm{A}^{\prime} \rightarrow 001, ~ ' \mathrm{~B}^{\prime} \rightarrow 002, ~ ' \mathrm{C}^{\prime} \rightarrow 110, ~ ' \mathrm{D}^{\prime} \rightarrow 120 \ldots$; if the machine has the function $110,120 \ldots$ in the basic menu, the assignation will be: ' $\mathrm{A}^{\prime} \rightarrow 110,{ }^{\prime} \mathrm{B}^{\prime} \rightarrow 120 \ldots$

## List of "Filler" functions:

| 001 | "EMPTY TUBES" |
| :--- | :--- |
| 002 | "FILL TUBES" |
| 110 | "CASH SEL" |
| 111 | "SALES SEL" |
| 113 | "FREE SALE" |
| 120 | "TOTAL CASH" |
| 121 | "TOTAL UNIT" |
| 122 | "TOTAL CASH V.L." |
| 125 | "CASH PRESELEC" |
| 126 | "UNIT PRESEL" |
| 141 | "CASH BOX" |
| 142 | "CASH IN CHANG." |
| 143 | "COINS IN C.G" |
| 145 | "CASH RET.MAN" |
| 146 | "MON.NOT GIV." |
| 147 | "CREDIT CARD" |
| 148 | "CRE.CARD DEC" |
| 149 | "BANKNOTES" |
| 162 | "TOKEN COLLEC" |
| 180 | "P/TOTAL SAL." |
| 183 | "P/MONEY CASH" |
| 185 | "P/MON.G.MAN." |
| 186 | "P/M.NOT GIV." |
| 187 | "P/CRED.CARD" |
| 188 | "P/M.CARD REC" |
| 189 | "P/BILLS" |
| 190 | "P/TOK.COLEC." |
|  |  |
